

Lab 4 instructions:

we working on rabbit game story, so you will find game story.txt have the game description.
until now the rabbit can walk and jump to his mother, when reaching to her, they start speaking.

- 1- in lab 3, the student wrote 3 functions: Mother rabbit talk, rabbit talk, update rabbit movement
- 2- you will ask the student to handle exceptions on that 3 functions.
- 3- ask them to write the scenario between the mother rabbit and rabbit in file (by writing store conversation function in scene1home.py)
 - a. make mother rabbit talk returns its sentences.
 - b. make rabbit talk returns its sentences.
 - c. they know if we open the file in write mode the file contents will delete, so ask them how to fix this problem. and handling the exceptions in opening file.
